Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments and the amendment filed 7/7/04 have been considered but are moot in view of the new ground(s) of rejection. During a brief interview on May 21, 2004, examiner agreed the amended claims 1-20 are overcome the Claims Rejections of the previous office action. However, the amendment does not place the application in condition for allowance. The claims are rejected as follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-12 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Andrus et al. (6,450,971). Andrus et al. disclose a balloon catheter including a balloon/dilatable bladder including thermally responsive indicator including thermochromatic materials as claimed (see col. 4, line 1 to col. 5, line 11), a fiber optic detector as claimed (see col. 5, line 12 to col. 7, line 3) and wherein thermally responsive indicator is adapted to change color in response to a change in temperature.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 13-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Solar (5,413,557) in view of Andrus et al. '971. Solar disclose all the limitations of the angioplasty catheter, as claimed for treating lesion in a body lumen (see figure 10) except for a presence of a thermally responsive indicator and a detector as claimed. Andrus et al. disclose a thermally responsive indicator and a detector as claimed for locating vulnerable plaque lesions within a body lumen. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made in view of Andrus et al. to employ a thermally responsive indicator and a detector, as claimed into Solar's angioplasty catheter in order to locate vulnerable plaque lesions to be treated in a body lumen.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is

Art Unit: 3731

not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
